05 — STRUCTURE

Built to stay still when the earth moves

An isolation layer beneath the tower — laminated rubber bearings and dampers — keeps the shaking from reaching home, while damping walls inside absorb what energy remains.

Hybrid
Hybrid seismic isolation + damping

Fewer columns, living spaces that make the most of the view

Certified
Certified Long-Life Quality Housing

Durability, energy efficiency and accessibility

Eco
Certified Low-Carbon Building

HEMS, water-saving faucets and more

Energy
ENE-FARM + storage battery

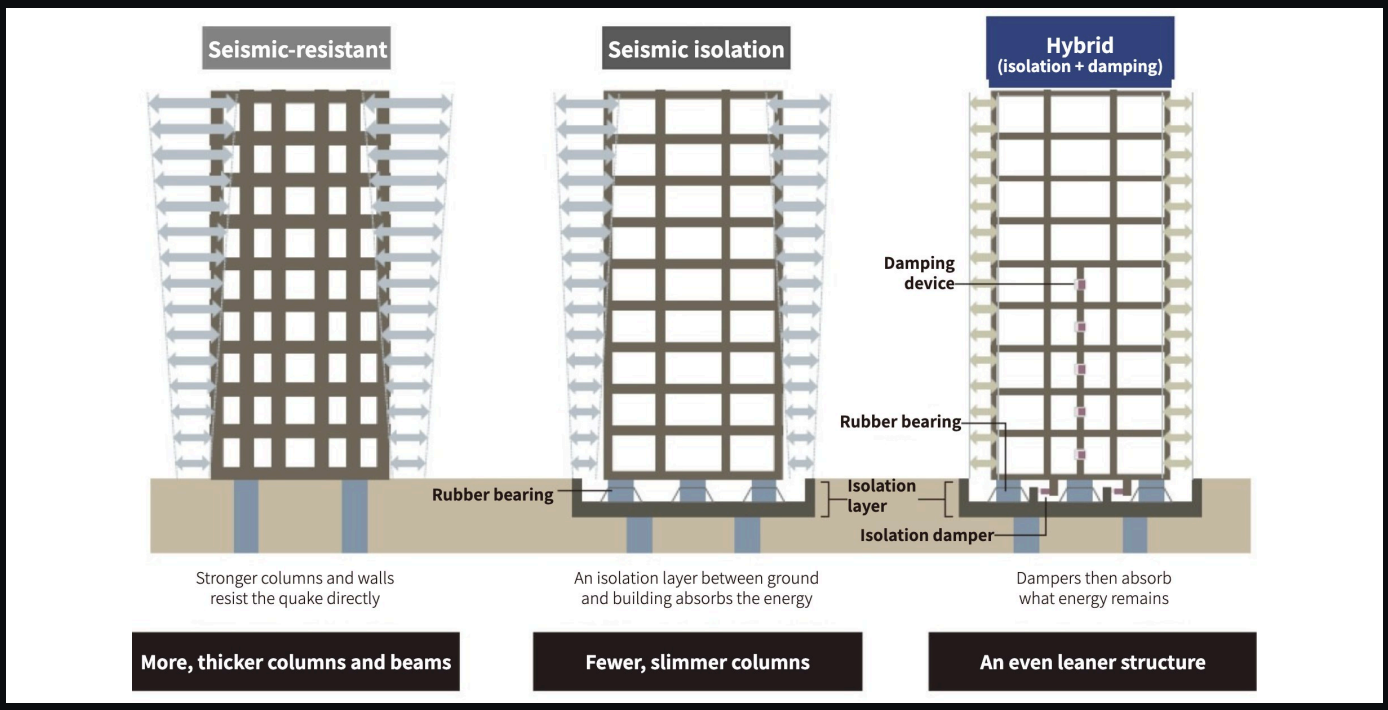

In every unit (a first in Japan for a condominium district)

Skeleton Infill
Skeleton-infill

Utility shafts placed outside the units

Ceiling
LD ceiling height approx. 2,600 mm

Window height approx. 2,100 mm, hallway width approx. 1,000 mm

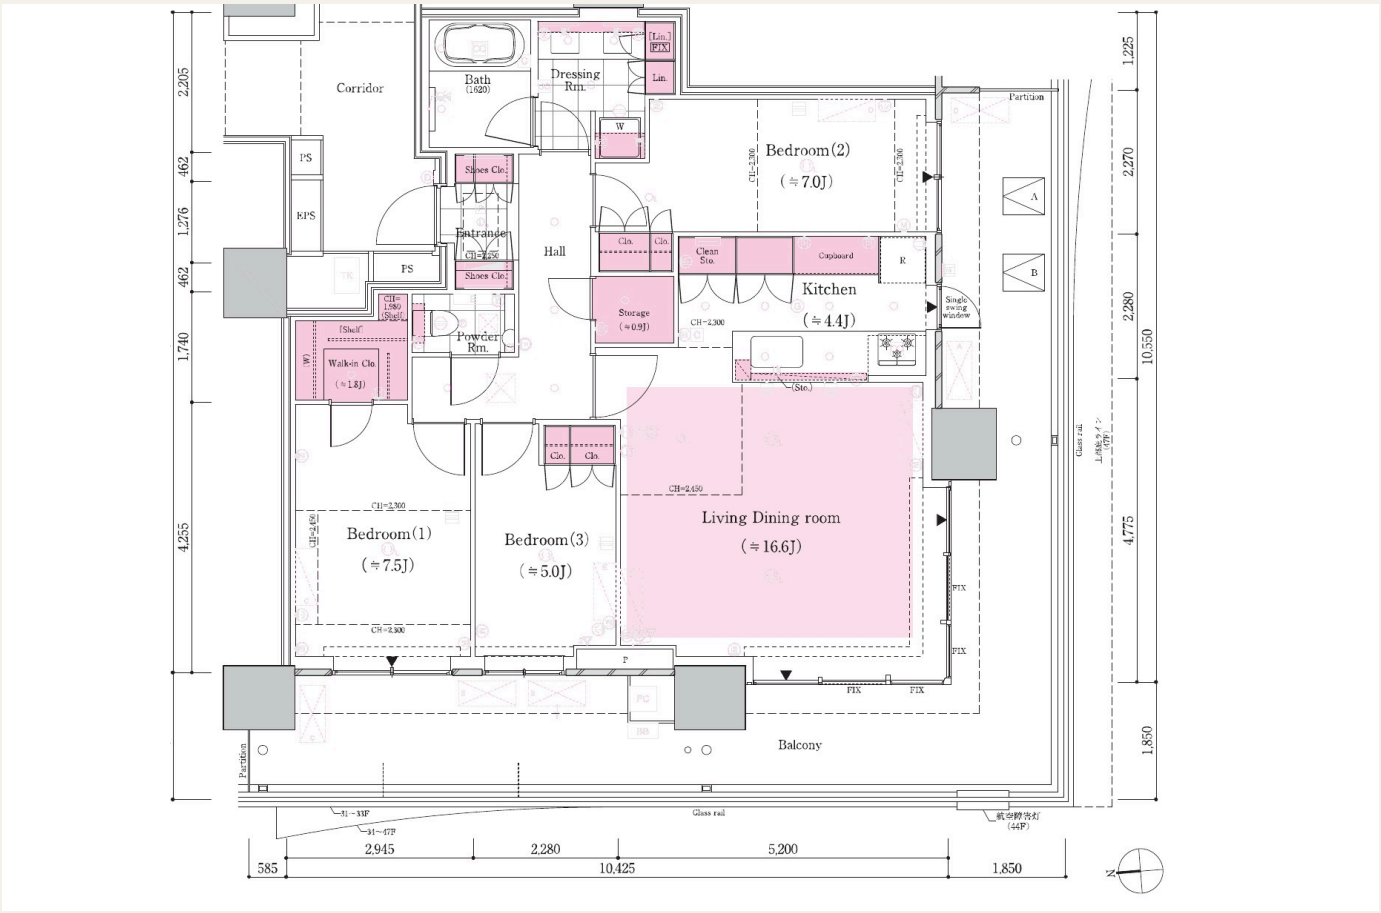

Structural concept diagram
Seismic-resistant vs. isolated vs. isolated + damped
